AccuFab-L4D Dental 3D Printer

Lit Up For Dentistry

ପ

easy to use

Light weight

Ultra-accurate results

open source

automatic calibration

large print size

Printer Size	360 x 360 x 530 mm	
Printer Weight	About 19 kg	
printing size (x/y/z)	192 x 120 x 180 mm	
Resolution	3840 x 2400(4K) Px	
print speed	10-50 mm/h (depends on layer thickness and materials)	
layer thickness	0.025/0.05/0.075/0.1 mm	
Accuracy	± 50 μm	

AccuFab D1s

UV LED

light source

405nm

wavelength

1920*1080

Resolution

144*81*160mm

printing size

±0.035mm

Accuracy

0.025/0.05/0.075/0.1mm

Layer Thickness

394*406 *755mm

Printer Size

30kg

Printer Weight

Wireless Plug and Play

economical

Smooth interface and easy operation

open source

Various practica lapplications

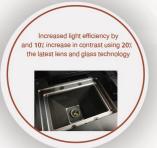

Ultra-accurate results

Scan Speed Increased speed over the previous product 30% so that the scanning speed of each scan is 25 seconds Accuracy Increased accuracy thanks to the improvement of the shooting mechanism also 30%. Scan depth Increase the scanning depth to more than 22 and get a more accurate scan for soft tissues User-friendly interface (UI) A seamless scanning experience for clinicians that enables even novices to get) perfect scanning results

Automatically indeutifies (AI) function Automatically identify and filter data during scanning Motion sensing Motion sensor to reduce communication between doctor and computer

A program that facilitates communication with the informant, enabling me to draw the edges, inspect the fixation areas and check the occlusion before sending It also facilitates communication between the doctor and the patient through the possibility of printing the example directly on the 3D printer, dental alignment, and comprehensive oral health report recording.

Features of the new head: it contains two heads, small for children and large, and an increase in the depth of photography by 15%, and also

The possibility of sterilizing the head with a dry sterilizer once, with a built-in anti-steam system inside the

cart option was designed: (the laptop for the scanner is Cart option)

Standard scanner tip: 16 mm × 12 mm × 22 mm Mini scanner tip: 12 mm × 9 mm × 22 mm	scanning field
-2-20 mm from exit surface of tip	scanning depth
Non-contact scanner with structured light	Scanning
281 mm × 33 mm × 46 mm	Dimensions (length - width - height
240 ± 10 g (without cables)	weight
STL, OBJ, PLY	extension
USB 3.0	Connection
12 V DC/3 A	Power

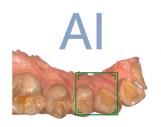

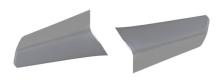

Aoralscan INTRAORAL SCANNER

- easy to use <
- Motion sensor feature <
 - artificial intelligence <
- No annual subscription needed <
- Reliability with accurate scanning and color accuracy and precise processing of the edges of the preparation
 - Full scanning with occlusal and undercut <a>analysis and automatic finish line creation

Autoclavable variable head

Flexibility to switch between two heads due to the difference in scanning angle (upper and lower)

LED light shows the working <a>status of the scanner

Accuracy between microns 10-40

High sensitivity to movement at 15 . speed FPS

Uses: (orthodontics - veneer - inlay/onlay implants (bridges up to three pieces -

Compatible with all drivers - ability to export to (EXOCAD)

No need to use powder
Integrated system to treat the resulting mist
,from the exhalation process there is no need for powder

SHINING 3D®

DS-MIX

Introducing the DS-MIX Scanner, the latest and most powerful version of shining 3d

With a new and modern design, it features two 5-megapixel cameras to give the most accurate

Details and at a record speed as it was developed from previous generations to depict all

Types of cases and non-fragmented examples, as the mechanism of scanning the jaws together has been developed

Technical Specifications

USB 3,0 port 2x5 MP
238x340x447mm dimensions <7um
STL,PLY extension Blue
AC 24 V Power. 7.5kg

Camera Resolution
Scan resolution
light source
weight

Ultra-fine details

Captures every detail like the edges of the crowns Braces and implant bodies It can identify ores textured body

Smart Scan

Flexible user interface and smart user experience very comfortable

Scan resolution

It depicts all kinds of cases and examples
Non-fragmentation also
developed scanning mechanism
Jaws together thanks to the two cameras
High Resolution 5 MP

high compatibility

,Open system files are exported in format stl ,ply and that corresponds to All cad cam systems

Unique design

Modern and beautiful open design
It is very practical
and easy to set examples
It is removable and easy to maintain
and switch to cut

High efficiency

High speed about 13 seconds
The jaws have 6 seconds
seconds for 4 props 18

new movable head to expand the scanning field

In addition to the previous functions featured in the previous version, it has been added New moving head to add scanning area or field .With significantly improved scanning speed The new version is equipped with a stand (All in one) .To enable the user to scan both jaws at the same time

Scanner Features

.working without segmentation examples \blacktriangleleft

.Very high efficacy <

.small size

.High scanning speed

.All-in-one scanner

.exports files in STL, OBJ format

High resolution camera, smart

user interface and easy-to-use software <a>.Scan the entire status in one go

Technical Specifications

1,3mega Pixels	Camera Resolution
< 10 um	Scan resolution
Blue	light source
5 kg	the weight
USB 3,0	port
260 x 270 x 420 mm	Scanner dimensions
STL,OBJ	Kharj suffix
AC 24 V	Power

Non-separated model

All in one

Texture

Impression

3D scanner is very practical in its size
Small, light weight and multi-functional
The amazing scanning speed is also very
commensurate with
Data captured in restorations and orthodontics
Dental and implant cases
